EXECUTIVE SUMMARY

Frontend-focused fullstack engineer with more than a decade developing scalable, performant web applications. Led e-commerce & SaaS front-end initiatives using React, Vue & modern JavaScript component libraries. Translates business needs into clean code. Seeking transition to product-driven environments for long-term impact and team collaboration. Dedicated to building great user experiences.

SKILLS

- Technical Skills: React, Vue.js, Node.js, Next.js, Redux, Zustand, TanStack, Material UI, Google Tag Manager, Tailwind CSS, Styled Components, SCSS, Nuxt.js, React Native
- Languages: Javascript, Typescript, Ruby, HTML, CSS, Lua, SQL, Python
- Tools: AWS, Storybook, Webpack, Vite, NPM, Yarn, Cursor, Claude Code, Qwen Code, Git, Lighthouse
- Soft Skills: Translating complex business needs into code, Rapid and reliable feature delivery, Stakeholder Collaboration, Knowledge Sharing, Attention to Detail, Empathy for User Experience, Constructive Feedback, Conflict Resolution, Documentation.

PROFESSIONAL EXPERIENCE

BORN GROUP

NEW YORK, NY

Senior Frontend Developer, hired as Junior Frontend Developer

2017-2025

- Championed adoption of React and Vue for new projects, modernizing front-end architecture and improving code maintainability across multiple client initiatives.
- Collaborated with stakeholders to refine requirements and scope MVPs through iterative feedback cycles, translating complex business needs into clean, maintainable code.
- Architected batch price update solution handling thousands of SKUs by implementing job-based UI with in-progress state tracking, preventing duplicate submissions and enabling efficient bulk catalog operations
- Authored comprehensive documentation and coding standards guide, improving code quality and maintainability for distributed development teams across agency and client side, utilizing TypeScript best practices and clear technical communication.
- Defined and enforced code standards and adopted BEM styling methodology, improving maintainability and scalability for project with cross-functional teams, utilizing CSS methodologies and code review practices
- Resolved critical memory leak, increasing infinite scroll stability from crashes at 20–40 pages to 100+ for tens of thousands of users, engaging in technical discussions with cross-functional teams and providing operational support.
- Independently planned and prototyped new CMS module functionality from Figma designs and user stories, optimizing reusable content components and menus for client requirements, using Jira, diagramming, and UX-focused front-end development.
- Led front-end development for e-commerce clients including Reformation, Brooks Brothers & Forever 21, delivering responsive, performant user experiences using React, Next.js, and Tailwind CSS.
- Collaborated with backend architects to define, refine, and implement new REST API endpoints for evolving business requirements, preventing frontend-origin bugs and expediting feature delivery for a high-volume application, leveraging requirements analysis, cross-team communication, and rapid prototyping.

- Mentored offshore frontend developers on React best practices and code ownership, redistributing responsibilities to maximize team productivity and code reliability within a multi-team agile environment, applying leadership, technical coaching, and code review.
- Led proof-of-concept migration of onboarding e-commerce platform for an ISP serving more than 2 million customers from Next.js (React) 12 to 13, reducing load times by 2 seconds by leveraging server-side rendering and performance optimization.
- Built and integrated 60% of CMS modules for legacy clothing brand relaunch, enabling faster content launches through third-party CMS API and developer training.

WEDIDIT INC.

BROOKLYN, NY

Junior Ruby on Rails Developer

2014-2016

- Collaborated with designer and leadership in weekly sessions to define front-end features and remove usability bottlenecks for beta nonprofit users, refining donor-prospecting experience through design feedback and stakeholder alignment.
- Designed and implemented responsive user interfaces, achieving a 200% increase in donation conversions for 30+ nonprofit clients using JavaScript, CSS, and UI development.
- Implemented robust test-driven development workflows and participated in strict agile sprints, ensuring consistent delivery of functional features and high-quality codebase for new SaaS product, utilizing unit testing, scrums, and version control.
- Integrated regular commit and pull request habits, safeguarding codebase integrity and enabling rapid identification of code changes for critical donation platform features, leveraging Git best practice

VINOUS MEDIA

NEW YORK, NY

Ruby on Rails Contractor

2013-2014

- Created cross-browser print style sheets, ensuring consistent shelf talker formatting across Internet Explorer, Firefox, Chrome, and Safari, covering all major browsers at the time, leveraging deep understanding of browser quirks and front-end development best practices
- Collaborated directly with client to define requirements and co-develop design prototypes, delivering rapid end-to-end project execution within 5 days, employing client communication, requirements gathering, and UX/UI design skills
- Engineered dynamic text sizing logic to accommodate varying review lengths, optimizing readability and fit for shelf talker constraints, automating formatting for a growing catalog of hundreds of wine reviews with Ruby and front-end customization

EDUCATION

APPACADEMY

NEW YORK, NY

Coding Bootcamp

2016-2017

ROLLINS COLLEGE

Winter Park, FL

Bachelor of Arts, Cum Laude

2007-2011
